Continuation of 3. Applicant's reply has overcome the following rejection(s): upon further review rejections under "103" to claim 1 and the dependent claims have been widtrawn (independent claim 11 remains rejected under the "102", see reason below).

Continuation of 5. does NOT place the application in condition for allowance because: As to claim 11, and as to the argument mede by applicant that the prior art Sone et al did not teach the processing and storing a sequence of instructions to be available for execution, the examiner's position is that every computer system's memory is a storage of instruction to be available for execution including the Sone's. The storing of the sequence of instructions in applicant's claim 11, does not show any specific format of the instruction storage, therefore, it is interpreted as any general storage or memory capble of storing the instructions available for execution in the system.
